

Index

- Chapter 1. Polymer nanomaterials for food packaging : Current issues and Future trends
Clara Silvestre, Marilena Pezzuto, Sossio Cimmino , Donatella Duraccio
- Chapter 2. Ethics, communication and safety in the use of PNFP
Yasemin J. Erden
- Chapter 3. Evolution of Rheology, Structure and Properties around the Rheological Flocculation and Percolation Thresholds in Polymer Nanocomposites
Rumiana Kotsilkova, Evgeni Ivanov , Ekaterina Krusteva , Clara Silvestre , Sossio Cimmino , Donatella Duraccio
- Chapter 4. Characterization of Safe Nanostructured Polymeric Materials
Geoffrey R Mitchell
- Chapter 5. Plasma Technology for Polymer Food Packaging Materials
Ondřej Kylián, Andrei Choukourov, Lenka Hanyková, Hynek Biederman
- Chapter 6. Polyolefins based nanomaterials for food packaging
Donatella Duraccio, Marilena Pezzuto, Sossio Cimmino and Clara Silvestre
- Chapter 7. Some Aspects Concerning the Nanomaterials from Renewable Resources for Use in Food Packaging
Cornelia Vasile, Georgeta Cazacu, Raluca Petronela Dumitriu, Raluca Nicoleta Darie, Irina Elena Răschip
- Chapter 8. Cellulose nanowhiskers: Properties and applications as nanofillers in nanocomposites with interest in food biopackaging applications
Marta Martínez-Sanz, Amparo López-Rubio and José María Lagarón
- Chapter 9. Edible nano-laminate coatings for food applications
Cerqueira, M.A., Bourbon, A.I.a, Pinheiro, A.C., Silva, H.D., Quintas, M.A.C and Vicente, A.A
- Chapter 10. Potential applications of nanomaterials in food packaging & interactions of nanomaterials with food
Ayhan, Zehra
- Chapter 11. Photo-Degradation of Poly(Lactic Acid) (PLA)/Organo-Modified Clay Nanocomposites under Natural Weathering Exposure
Mustapha Kaci, Aida Benhamida, Lynda Zaidi, Naima Touati and Chérifa Remili
- Chapter 12. Recycling of ecosustainable nanomaterials
Marek.A Kozłowski
- Chapter 13. Polymer Nanocomposite materials used for food packaging
Erich Kny
